About Me

Motivated and enthusiastic software engineering student with strong foundations in web development, cloud technologies, and machine learning. Eager to gain hands-on experience, apply academic knowledge, and contribute to impactful projects.

Education

National Institute of Applied Science and Technology (INSAT) Sept 2022 – Present
Software Engineering Degree (in progress)

High School of Zaouia, Ksiba Thrayet
Baccalaureate – Mathematics *Average: 18.05/20*

Experience

Software Engineering Intern – WeeFizz Jun 2025 – Aug 2025

- Developed the backend using **NestJS** and the frontend using **Flutter**.
- Implemented machine learning models, including a computer vision model for fabric classification and an object detection model using **OpenCV**.
- Collected, cleaned, and prepared datasets through **web scraping** to support model training and evaluation.
- Participated in testing, integration, and documentation of the application.

Projects

Freelancing Website

Developed a platform for online job applications.
Tools: HTML, CSS, JavaScript, PHP, Symfony, MySQL

Carpooling Website

Created a carpooling platform with messaging capabilities.
Tools: HTML, CSS, JavaScript, React, C#, ASP.NET, MSSQL

Certifications & Skills

Certifications:

- DevOps using Jenkins & Kubernetes
- AWS (Beginner)

Technical Skills:

- Web: HTML, CSS, JavaScript, React, PHP, ASP.NET, NestJS
- Mobile: Flutter
- Cloud & DevOps: AWS, Jenkins, Kubernetes
- Machine Learning: TensorFlow, Scikit-learn, Pandas, NumPy, OpenCV
- Languages: C, C++, C#, Java, Python
